

Moon Jellyfish Craft

1) Draw four circles on the bottom of a paper bowl.

2) Paint the bowl using iridescent white paint (or silver or very pale blue).

3) Cut three unused small white plastic bin liners or one large sheet of white tissue paper into long, thin strips.

4) When the paint has dried, turn the bowl over. Use sticky tape (for the plastic) or glue (for the tissue paper) to stick the strips round the edge of the bowl.

6) OPTIONAL: Trace over the circles you drew using blue, silver or white glitter glue.

5) Get an adult to make a hole in the centre of the bowl and attach a piece of string or wool.

7) When dry you can hang your jellyfish up as a decoration or make it 'swim' by holding the string and running around with it.
