

How To Make Your Troll

1) Use the templates to cut out shapes from craft foam.

2) Stick the head and tummy onto the body (as shown in the picture).

3) Stick the nose onto the face.

4) Use a black pen to draw eyes, a mouth and a belly button.

5) Stick the hair slightly behind the head so that it is attached but sticks up.

6) Optional: To turn your troll into a finger puppet, cut a strip of card approximately 3 cm by 10 cm. Wind the card round your finger and then glue it to make a circle slightly larger than your finger. When the glue has dried, stick the card to the back of your puppet.

NB: Use a suitable glue for craft foam such as tacky pva. Make sure your troll is completely dry before playing with it.
