

Christmas Tree Beaded Serviette Holder

You will need 4mm beads with reasonably large holes in the following colours:

9 x black

1 x yellow or gold

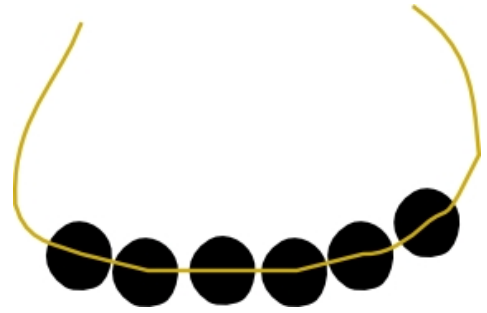

117 x green

You will also need craft wire of gauge 28.

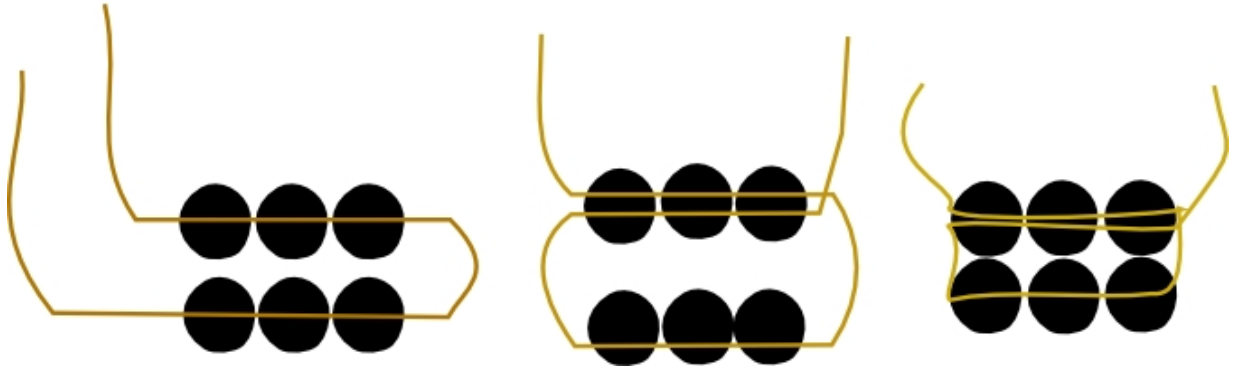

Detailed Instructions

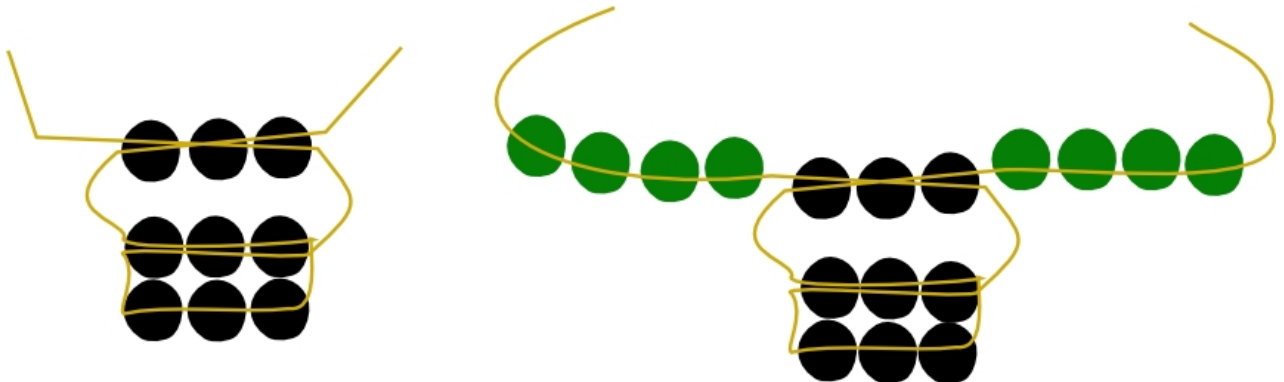

Begin by threading 6 black beads onto your wire.

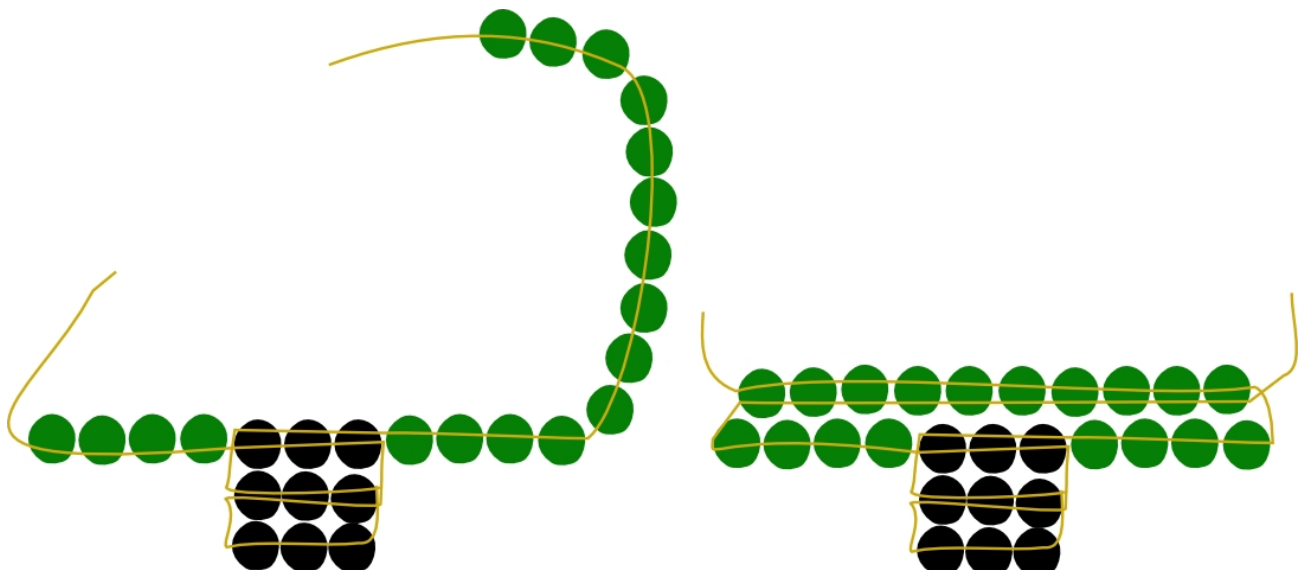

Re-thread one end of your wire through three of the beads and pull tight.

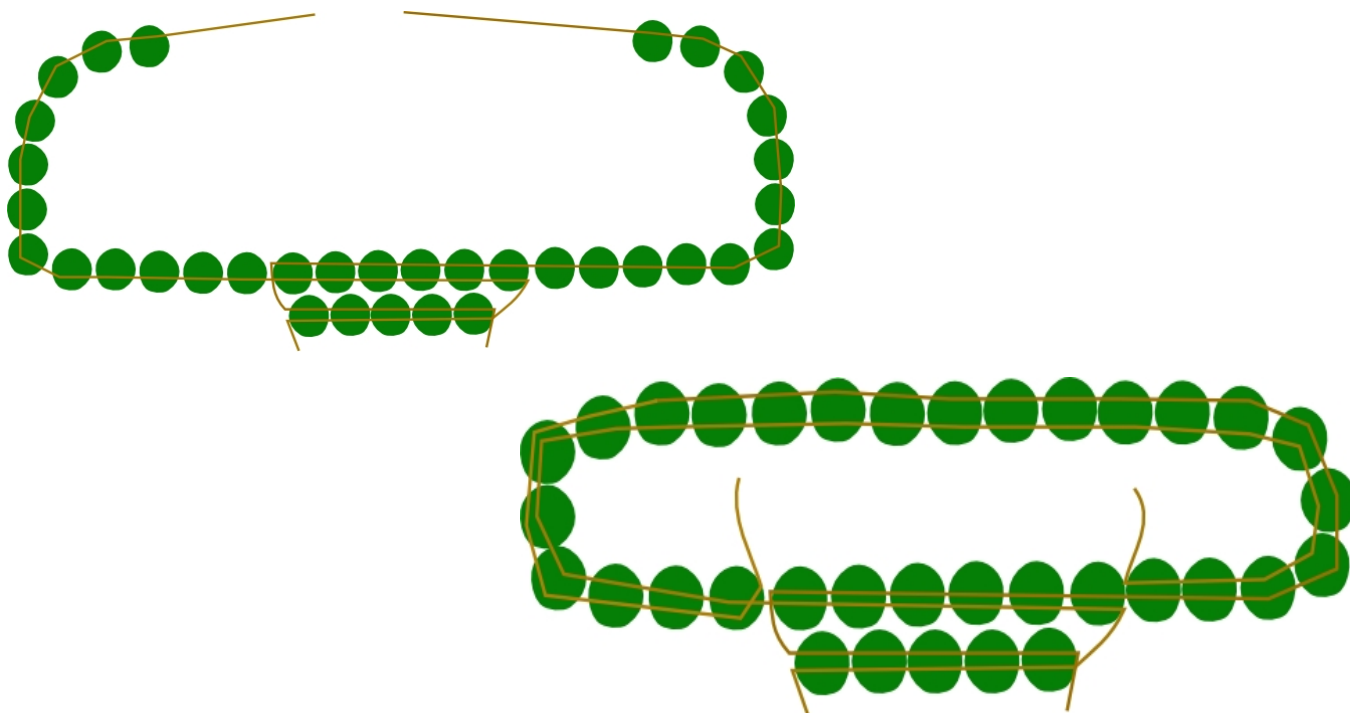

Thread 3 black beads as shown below. Then add 4 green beads to each piece of wire.

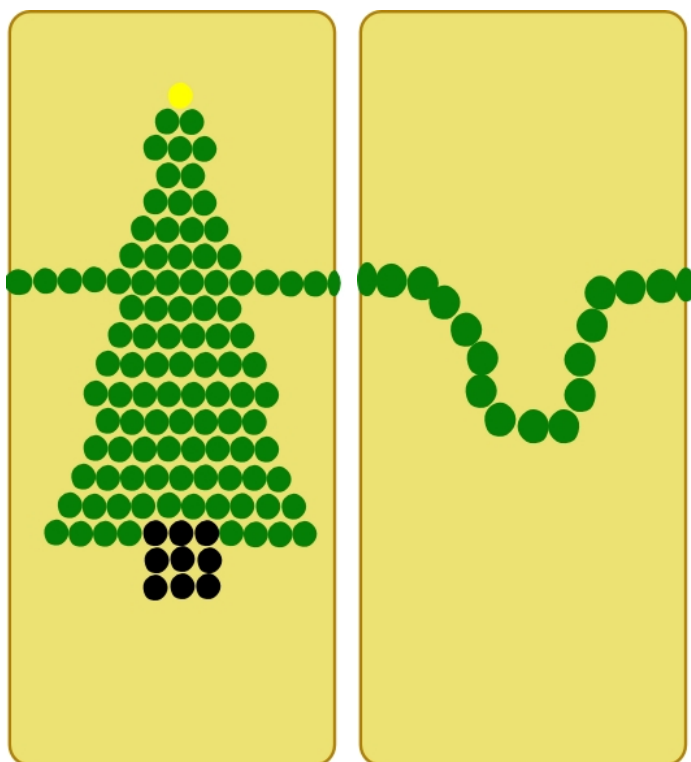

Thread 10 green beads onto one wire. Thread the other piece of wire through the 10 beads.

Lines 5 to 11 are threaded in the same way as line 5, simply using a different number of beads. After line 12, thread 12 beads onto each end of wire, then thread each wire through the opposite set of beads. Pull the wire tight to form a circle.

Continue to thread lines 13 to 19 as normal. After threading the last bead, neatly twist the wire round to secure it. Tuck your folded napkin inside the circle then gently pinch the back to hold it in place.
