

Instructions for making a Leaf Rubbing Bird

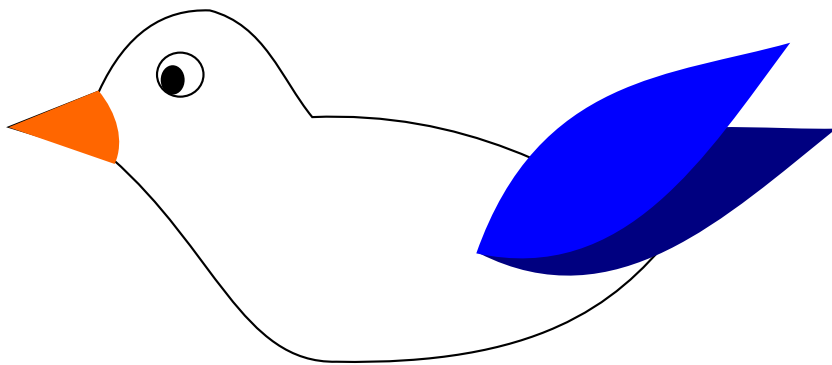

1) Cut the body shape from card and colour in the beak. Stick on a goggle eye.

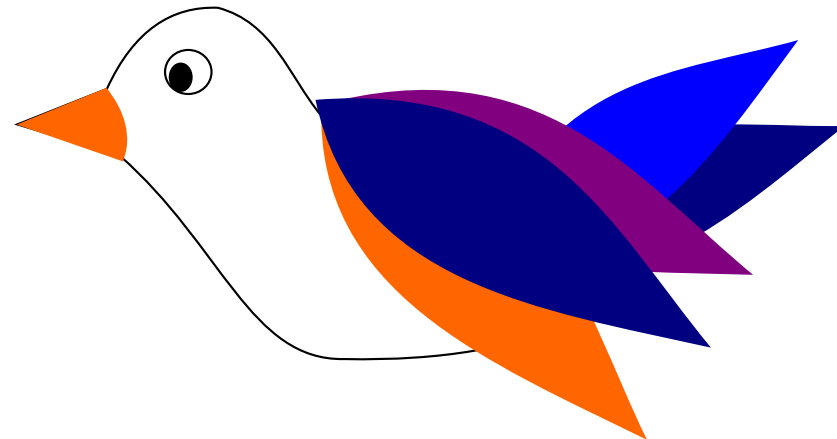

2) Gather 2 long feather shaped leaves, one slightly smaller than the other. (Freshly fallen leaves work best.) You will also need paper and coloured crayons. Place one leaf under a sheet of paper. Rub with the flat edge of a crayon, then cut out.

3) Repeat step 2 until you have 3 larger leaf and 2 smaller leaves. Glue them to your bird as shown below:

Smaller leaf rubbings as tail feathers.

Larger leaf rubbings as wings.
