

## Balancing Butterfly Instructions

- 1) Stick your chosen template to a sheet of coloured or white card.
- 2) Decorate your butterfly.
- 3) Cut your butterfly out.
- 4) Use sticky tape or strong glue to attach coins to the tip of the underside of the wings as shown below. (If using the small templates on thin card try 1p pieces; if using the large templates on thick card you will need several heavy coins and/or bluetac. The coins should be heavy enough to tip the butterfly forward when resting on its head.)

- 5) Now try balancing your butterfly on a flat corner. You could try balancing it on the edge of a table, an empty cup, your finger or on your big toe. If you're feeling really silly - hold a competition to see how many butterflies people can balance on themselves at once!
