

How to Make a Spider Using Wool

1) Cut 48 30cm pieces of black wool.

2) Gather them all together, folding them in the centre.

3) Tie another piece of black wool a few centimetres from the end to make the head.

4) Make a plait from 12 pieces of wool (3 x 4).

5) Tie a small piece of wool around the bottom of the plait and cut off the excess.

6) Repeat until you have plaited all the wool ends into legs (there should be 8 of them).

7) Add goggle eyes.
