

Template for Making a Lion Finger Puppet

- 1) Cut out all the pieces.
- 2) Glue yellow circle to the centre of the orange felt.
- 3) Glue the white/cream to the bottom of the face.
- 4) Glue on the nose.
- 5) Use a black pen to draw on the mouth (see picture) and stick on goggle eyes.
- 6) Carefully glue around the edge of the two body pieces, leaving the arms. Push together. Alternatively stitch the pieces together, folding the arms inside and then turn your puppet inside out.
- 7) Glue the bottom of the head to the top of the body.
- 8) Leave to completely dry before using the puppet.

Using the correct glue: You need a glue that will stick felt. A tacky pva intended for craftwork should work well. Put glue on the two pieces that will be stuck together and then leave for 30 seconds before putting them together. This will let the glue dry slightly, helping to stop it soaking into the material.
