

Instructions for making a Father Christmas Finger Puppet

1) Cut out the pieces using the template at <http://ideas4kids.org/138>

2) Carefully glue where shown using a glue suitable for sticking felt. With most glues you should wait 30 seconds or so for the glue to dry slightly before pushing the pieces together. Put your finger gently in the centre as shown then move to one side to dry. Alternatively, tuck the arms inside, sew the pieces together and then turn inside out.

3) Glue the beard onto the face and then glue on the moustache.

4) Glue the hat together as shown above. Glue or stitch the hat to the face.

5) Glue the belt onto the body. Glue the buckle onto the belt.

6) Glue the face onto the body. Add goggle eyes.

7) Ensure your Father Christmas is completely dry before playing with him.

Please note that small parts make this craft unsuitable for children under the age of 3.
